"MOON SHUTTLE"™ UPRIGHT

1. GAME SET-UP

A. INTRODUCTION

TAITO AMERICA'S CORPORATION'S "MOON SHUTTLE"™ upright is an electronic video arcade game designed for one or two players.

The object of the game is to destroy the attacking Centrons, Electric Jelly, Plasma Jacks (which divide when hit) and the Retons which are worth extra bonus points. Also to maneuver the players spaceship through the meteor belt safely.

The player has the ability to move his spaceship upward and downward to avoid a collision, also to the right to speed the spaceship through the meteor belt, this can be accomplished only in the meteor sequences. The FIRE button is used to destroy the aliens and the meteors in order to provide a path through the meteor belt. The players spaceship has unlimited firing power. As the screens progress some of the meteors have more vertical movement than others which makes it more difficult to avoid a collision.

The band of meteors of various shapes and sizes move toward the player at varied speeds. Sometimes these meteors will split into smaller pieces. The player has to fire enough times and with enough accuracy to create his own path through the meteor belt. If the players spaceship should collide with a meteor it would be destroyed. The challenge of the meteor belt gets more difficult with each meteor sequence.

A smaller spaceship appears randomly hidden among the meteors in the meteor belt sequence, if the players should destroy this spaceship and additional spaceship would be awarded him.

"MOON SHUTTLE" has a Mega-Score Feature which gives the player the capability of adding extra spaceships by inserting additional coins once the game is in play.

B. GAME INSPECTION

TAITO AMERICA'S CORPORATION'S "MOON SHUTTLE"™ upright game is ready to play when received. However, careful inspection is necessary to insure your game is in perfect condition. Please verify the following before turning the game on.

- * Examine external parts for chips, dents, or broken parts.
- * Open the service door and examine the following:
 - * Plug-in connectors to make sure they are firmly seated.
 - * Speaker
 - * Player controls
 - * Printed circuit boards making sure there is no damage to the components.
 - * Check for loose foreign objects especially metal objects which may cause electrical problems.
 - * Fuses, making sure they are firmly seated in the holders.
 - * Coin Mechanisms

The Video Monitor is properly adjusted before shipping. If there are any adjustments necessary refer to our Video Monitor Manual (72-00003-001).

If problems occur or technical assistance is required, contact our Customer Service Department HOT LINE Toll Free 800-323-0666 (except Illinois). Illinois phone 312 981-1000 X215.

POWER REQUIREMENTS

TAITO AMERICA CORPORATION'S "MOON SHUTTLE"™ upright game is shipped ready for operation at 120VAC, 60Hz with a power consumption of approximately 250 Watts.

CAUTION

For safe operation it is recommended the cabinet be grounded. This game is equipped with a three conductor power cable. The third conductor is the ground conductor and when the cable is plugged into an appropriate receptacle, the game is grounded. The offset pin on the power cable's three-prong connector is the ground connection.

LOCATION SPACE REQUIREMENTS

Depth - 35" (87.5cm)
Width - 24" (61 cm)
Height - 68" (171 cm)
Weight - 300 lbs.
(Packaged Weight)

D. DIP SWITCH AND VOLUME CONTROL SETTING

DIP SWITCH SETTINGS

TAITO AMERICA'S "MOON SHUTTLE" game provides the following option switches. See Figure 1. These options can be found on the Game Board "A".

SW 1 and SW2 are used for selecting the number of rockets.

ROCKETS	SW1	SW2
3	OFF	OFF
4	ON	OFF
5	OFF	ON
6	ON	ON

SW3 is used to set the bonus level. If SW3 is in the OFF position the bonus level is 15,000 points, if in the ON position bonus level is 30,000 points.

SW4 and SW5 are used for coin selection.

COIN SELECTION	SW4	SW5
1 Coin - 1 Credit	OFF	OFF
2 Coins - 1 Credit	ON	OFF
3 Coins - 1 Credit	OFF	ON
4 Coins - 1 Credit	ON	ON

SW6, SW7, SW8 are normally in the ON position, when in the OFF position are used for a FREE play.

OPTION SWITCH & VOLUME CONTROL LOCATIONS

FIGURE 1

VOLUME CONTROL SETTING

The Volume Control is located on the Game Board "A", when turned as indicated in Figure 1 the volume increases.

2. MAINTENANCE

All games require a certain amount of maintenance to keep them in good condition. A periodic check of mechanical controls would be beneficial to guarantee your game will be profitable.

A. CLEANING

The exterior of the game, all metal parts and all plastic parts can be cleaned with a non-abrasive cleanser. Caution should be used when cleaning the plastic, a dry cloth can cause scratches and result in a foggy appearance.

B. FUSE REPLACEMENT

This game uses six fuses, 5 are located on the Switching Regulator. See Figure 2 for size and part number of fuses. One fuse is located on the Power Supply itself.

C. VIDEO MONITOR REMOVAL

If you need to remove the Video Monitor, follow the instructions listed below:

CAUTION

It is recommended the game be left disconnected for at least one hour before removing the video monitor. This will probably discharge the video tube but **EXTREME CAUTION** is still necessary.

- * Disconnect power from the line voltage.
- * Disconnect the monitor cable connector.
- * Remove the wire cable clamp.
- * Take out the two side bolts, one on each side of the cabinet.
- * Remove the four mounting bolts and disconnect the green ground wire.
- * Slide the Monitor out by pulling the Monitor toward you.

CAUTION

Use **EXTREME CAUTION** and do not touch electrical parts of the Monitor Yoke area with your hands or with any metal object in your hands! High voltages may exist in any Monitor, even with power disconnected.

D. VIDEO MONITOR ADJUSTMENTS

TAITO AMERICA CORPORATION presently uses either a Wells-Gardner Corporation or Electrohome 19" color Video Monitor in the "MOON SHUTTLE"™ upright game. Refer to the Monitor Manual (72-00003-001) for your specific Monitor. Be sure to heed all the **WARNINGS** and **CAUTION INSTRUCTIONS** provided before repairing or replacing your Video Monitor.

E. FLUORESCENT TUBE REPLACEMENT

CAUTION

If you drop a fluorescent tube and it breaks, it will explode! **PLEASE USE CARE WHEN REPLACING.** See Figure 3.

- * Remove the three (3) screws from the marquee bracket, being sure to hold the glass while removing the screws.
- * Remove the Marquee glass and the Fluorescent Bulb is accessible.
- * With both hands turn the bulb toward you, carefully pull the lamp out of the lamp socket.

F. PRINTED CIRCUIT BOARD REPLACEMENT

You may wish to remove the "MOON SHUTTLE"™ upright printed circuit boards for replacement or servicing. See Figure 4 to remove the "MOON SHUTTLE"™ upright board set. Disconnect the G Connector and then Disconnect the Video Connector. Pull the board set toward you and out of the wooden cleats.

WARNING

This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. As temporarily permitted by regulation it has not been tested for compliance pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.
